83%

## Increased Walking Speed

Greater confidence and mobility

## Who Can Benefit from SciMoTech Therapy?

### Adults 40+ with Chronic Knee Pain

Persistent discomfort affecting daily activities and quality of life

### Limited Success with Traditional Treatments

Tried injections, physical therapy, or braces, etc. without lasting relief

### Active Individuals Seeking Mobility

Want to stay independent and maintain an active lifestyle

### Pre or Post-Surgical Patients

Looking for better function and pain management options

- ❑ **If knee pain affects your ability to walk, climb stairs, or sleep comfortably, SciMoTech Therapy may be the solution you've been searching for.** Our personalized approach addresses the root biomechanical causes of your pain, not just the symptoms.

# The SciMoTech Experience: Your Path to Pain-Free Movement

## Precision Gait Analysis

Motion lab data identifies biomechanical factors contributing to knee pain.

## Personalized Device

Based on your unique gait analysis, we custom-fit devices designed specifically for your needs

## Home-Based Therapy

Simple daily use for just 30-60 minutes fits seamlessly into your routine

## Meaningful Relief

Experience improved comfort, enhanced walking confidence, and a return to the activities you love

## Why Patients Choose SciMoTech Therapy

### Clinically Proven Approach

Clinically proven: 80% improved gait symmetry, reduced pain, and enhanced function within 12 weeks, delivering real, measurable outcomes.

- Non-invasive and completely drug-free treatment
- Personalized for your unique biomechanics
- Supported by licensed physical therapists
- Proven to restore mobility and reduce pain

"I am so thankful for SciMoTech. It's gotten me off the couch and moving again - it's just amazing." – Melissa, 74
